

Developments in Chemical Engineering & Mineral Processing

The Australasian Research Journal

Volume 10, Numbers 1/2, 2002 ISSN 0969-1855

Special Theme Issue: Practical Applications of Process Systems Engineering

- 5 Editorial: *G. P. Rangaiah, Dept of Chemical and Environmental Engineering, National University of Singapore*
- 7 A Study on Increasing Separation Efficiency of an Industrial, Compound Distillation Column
Shengjing Mu, Hongye Su, Yongyou Hu and Jian Chu
- 19 Time Optimal Control of a Binary Distillation Column
Rein Luus
- 33 Simulation and Optimization of Linear Alkylbenzenes Distillation Process
Yongyou Hu, Hongye Su, Jingwei Lu, Shengjing Mu, Jian Chu and Jun Wu
- 47 A Study in Advanced Control Application to an Azeotropic Distillation Column within a Vinyl Acetate Monomer Process Design
Donald G. Olsen, Brent R. Young and William Y. Svrcek
- 61 Application of Adaptive Fuzzy Neural Network for Forecasting Coal Slagging in a Power Station
Chuguang Zheng, Gehui Liu and Yongli Huang
- 77 Modelling and Simulation of a Top-Fired Primary Steam Reformer using gPROMS
A.J. Dunn, J. Yustos and I.M. Mujtaba
- 89 Optimisation of Methyl Tert-Butyl-Ether (MTBE) Synthesis Processes using AspenPlus
S. Kim and P.L. Douglas
- 105 Models of an Industrial Evaporator System for Education and Research in Process Control
Kiew M. Kam, Prabirkumar Saha, Moses O. Tadé and G.P. Rangaiah
- 129 Development of a Resin Transfer Molding Test-bed with Process Control Capability
Kaushik Raghavan and Srinivas Palanki
- 143 Rapid Solution of Stiff Differential Equations and Accurate Numerical Laplace Inversion of Steep and Oscillatory Functions Using I_{MN} Approximants
O. Taiwo and R. King

- 165 Use of Simulation and Expert Systems to Increase the Energy Efficiency in Cane Sugar Factories
Oswaldo Gozá León, Héctor Pérez de Alejo Victoria and Marcel Rijckaert
- 181 Process Systems Engineering: Successful Application in an Industrial Process
Yu-Chu Tian and Moses O. Tadé

General Paper

- 197 Holdup and Pressure Drop in Vertical and Near-Vertical Three-phase Up-flow: A Collection of FlowRegimes
P.L. Spedding, G.S. Woods, R.K. Cooper and J.K. Watterson
- 220 *Announcement: Forthcoming Special Theme Issues*
