Developments in Chemical Engineering & Mineral Processing

The Australasian Research Journal

Volume 12, Numbers 5/6, 2004 ISSN 0969-1855

Special Theme Issue: Environmental Science and Engineering

445 Editorial: *Dr Joe da Costa and Professor Victor Rudolph, Division of Chemical Engineering, The University of Queensland, Australia, and Associate Professor Yinghe He, Department of Chemical Engineering, James Cook University, Queensland 4811, Australia*

447 Hydrogen Economy Options for Australia
B. McLellan, J.C. Diniz da Costa, A.L. Dicks, V. Rudolph, R.J. Pagan, C. Sheng and T.F. Wall

461 Research and Development Trends in Biodiesel
V. Rudolph and Y. He

475 Optimization of the Reaction Rate in the Photocatalytic Degradation of Sodium Lignosulfonate in a TiO_2 Slurry Reactor: A Multivariate Study with Response Surface Analysis
E. Shoko, J.C. Diniz da Costa and E.T. White

491 Constructed Wetlands for Water Pollution Control – Processes, Parameters and Performance *M. Greenway*

505 Organic Carbon Mineralisation in a Subtropical River
P.C. Pollard

515 Kinetic Model for the Water Oxidation Method for Treating Wastewater Sludges *M.A. Imteaz and A. Shanableh*

531 An Assessment of Tarong Bottom Ash for Use on Agricultural Soils
C. Wearing, C.J. Birch and J.D. Nairn

545 The Validation of a Simple Gaussian Dispersion Model for Determining Odour Emission Rates from Area Sources *G. Galvin, S. Lowe and R. Smith*

559 Laboratory-scale Assessment of Chemical Sprays using Dynamic Olfactometry
N. Hudson and D. Duperouzel

General Papers

573 A Tutorial on Model Predictive Control: Using a Linear Velocity-Form Model
Liuping Wang
