

# Developments in Chemical Engineering & Mineral Processing

*The Australasian Research Journal*

---

Volume 14, Numbers 3/4, 2006      ISSN 0969-1855

*Special Theme Issue:*

## *Recent Chinese Developments in Ferrous Metallurgy*

- 341 Guest Editorial: *Professor Maofa Jiang and Professor Zhouhua Jiang, Northeastern University, P. R. China*
- 343 Physical Modeling and Optimization of Bottom Tuyere Configuration and Blowing Parameters in a Top and Bottom Combined Blowing Converter  
*Liang-Cai Zhong, Jun-Ying Chen, Zhe-Long Lei, Chen-Xi Ji, Ying-Xiong Zhu and Mao-Fa Jiang*
- 353 Metallurgical Characteristics and Effectiveness of Metallic Charges in Electric Arc Furnace  
*Cheng-Wu Du, Miao-Yong Zhu, Li-Na Sun and Shi-Ze Dong*
- 363 Heat Transfer and Inclusion Behavior in Continuous Casting Tundishes  
*Miao-Yong Zhu, Yong-Lai Wu, Shu-Guo Zheng, Ya-Xian Chen and Zong-Ze Huang*
- 375 Development of Deep Desulfurization Technology with Premelted Slag during RH-KTB Refining  
*Dong-Ping Zhan, Zhou-Hua Jiang and Wen-Zhong Wang*
- 385 Chlorination-Vaporization Reaction of Pb-Oxychloride in Pyrometallurgical Recycling Process of Dust and Ash  
*Nan Wang and Min Chen*
- 397 The Model of Super Order Sub-Regular Melts  
*Guo-Chang Jiang, Shao-Bo Zheng and Kuang-Di Xu*
- 409 Synthesis of Hydration-resistant CaO Refractory by Addition of MgO  
*Min Chen, Nan Wang, Jing-kun Yu and Zong-shu Zou*
- 417 Monitoring, Forecasting and Simulation of the Steelmaking Process  
*Xin Hong, Jia-Ying Chen, Shao-Bo Zheng, Xiao-Lei Qiu*

- 429 A Mathematical Model of the Decarburization in UHP Electric Arc Furnace Charged with Hot Metal  
*Zhou-Hua Jiang, Wei Gong and Wen-Zhong Wang*
- 439 Effect of Refining Slag Composition on Inclusions in Molten Steel treated by Barium-bearing Alloy  
*Yang Li, Zhou-Hua Jiang and Yang Liu*
- 449 Mathematical Modeling of the Vacuum Chamber of RH-KTB Process  
*Zong-Ze Huang, Yi-Sheng Chen and You-Duo He*
- 459 Study on Lubrication and Friction between Strand and Mould in Continuous Slab Casting  
*Man Yao, Xu-Dong Wang and Bo Du*
- 473 The Inverse Problem-Based Interfacial Heat Transfer between the Billet and Mould, and the Crack Sensitiveness Area of Strand  
*He-Bi Yin, Man Yao and Da-Cheng Fang*
- 487 Utilization of Metallurgical Slag as Resource Materials in China  
*Jian-Guo Shen, Chun-Yuan Guo, Min Chen, Jing-Kun Yu and Mao-Fa Jiang*
- 495 Influence of Iron Ore Indirect Reduction on the Transfer Process in Porous Media  
*Ming-Chun Li, Yan-Wen Tian and Yu-Chun Zhai*

**General Papers**

- 505 Heat Exchanger Network Dynamic Analysis  
*Brent R. Young, Denis L. Westphalen and William Y. Svrcek*
- 515 Microencapsulation Based on Emulsification for Producing Pharmaceutical Products: A Literature Review  
*Hua-Jiang Huang, Xiao Dong Chen and Wei-Kang Yuan*
- 545 Prediction of Scale Formation Problems in Oil Reservoirs and Production Equipment due to Injection of Incompatible Waters  
*J. Moghadasi, H. Müller-Steinhagen, M. Jamialahmadi and A. Sharif*
- 567 Prediction of Multiphase Horizontal Pipe Flow: A Reassessment
- 584 Part I: Evaluation of Two-Phase Correlations  
Part II: Pressure Drop Prediction in Three-Phase Gas-Oil-Water Flows  
*P.L. Spedding, E. Benard and G.F. Donnelly*
