

# Developments in Chemical Engineering & Mineral Processing

---

Volume 4, Numbers 1/2, 1996

ISSN 0969-1855

## Special Theme Issue Process Systems Engineering

### 3 *Guest Editorial*

*Associate Professor Peter L. Douglas, University of Waterloo, Canada*

### *Papers*

- 5 Multi-stage flash desalination process: A thermal analysis.  
*H. El-Dessouky, H.I. Shaban and H. Al-Ramadan*
- 23 Mathematical modeling of the prereduction process of iron ore in a circulating fluidized bed.  
*Y.B. Hahn, Y.H. Im, K.J. Kim, D.G. Park, I.O. Lee, I.S. Nam and K.S. Chang*
- 39 Optimal design with optimal uncertainty in parameters and control variables.  
*A.W. Longley and P.L. Douglas*
- 61 Application of compensation control in FCC main fractionator.  
*S.H. Yang, X.Z. Wang, C. McGreavy, X.X. Sen and F.Z. Mao*
- 71 On-line inferential models in nonlinear multivariable control applications.  
*R.M. Ansari and M.O. Tadé*
- 85 Generating operating command sequences for the regulation of complex chemical processes using artificial intelligence techniques.  
*J.R. Roach, B.K. O'Neill and P.J. Strimaitis*
