

Developments in Chemical Engineering & Mineral Processing

The Australasian Research Journal

Volume 9, Numbers 3/4, 2001

ISSN 0969-1855

Special Issue: 4th International Symposium on Coal Combustion

- 209 Editorial *Haiying Qi, The State Key Laboratory of Clean Combustion of Coal, Tsinghua University, Beijing, P.R. China*
- 211 Principles for Utilization of Seawater in the Flue-Gas Desulfurization Process
Tong Yao
- 219 The Partitioning of Arsenic, Selenium, Cadmium, and Cesium during Pulverized Coal Combustion in a 17 kW Downflow Combustor
W.S. Seames and J.O.L. Wendt
- 233 Classification of Micro-Particles in Fly Ash
Jun-Min Sun, Qiang Yao and Xu-Chang Xu
- 239 Numerical Simulation of Slagging Films in the Aachen Pressurized Coal Combustion Facility
M. Hecken, L. Reichelt and U. Renz
- 253 Burnout Behaviour of Bituminous Coals in Air-Staged Combustion Conditions
F. Kluger, H. Spliethoff and K.R.G. Hein
- 267 Self-Desulphurization and Self-Denitrification Properties and Mechanisms in Biobriquette Combustion
Hee-Joon Kim, Guo-Qing Lu, Hidenobu Maruchi, Tian-Ji Li, Hiroyuki Noda and Masayoshi Sadakata
- 279 Effects of Steam Reactivation on the Pore Characteristics of Calcium-based Absorbent
Ai-Jun Wang, Hai-Ying Qi, Chang-Fu You, Ping Lu, and Xu-Chang Xu
- 289 A Model for Flue Gas Desulfurization with Lime Absorbent at Middle Temperature
Chang-Fu You, Hai-Ying Qi, Wei Wang and Xu-Chang Xu
- 301 A Study of the Reactivity and Formation of the Unburnt Carbon in CFB Fly Ashes
Yong Li, Jiang-Sheng Zhang, Qing Liu, Ji-Ling Lu, Guang-Xi Yue, A.F. Sarofim, J.M. Beér, Yam Y. Lee and B. Eliasson
- 313 Mineral Matter Transformation During Pulverized Coal Combustion
E.G. Eddings, K.A. Davis, M.P. Heap, J.R. Valentine and A.F. Sarofim

General Papers

- 329 Simulation of NO_x Formation in Methane-Air Turbulent Combustion using an Improved Second-Order Moment Model
C.G. Zheng, L.X. Zhou and J. Yin
- 343 Effect of Char Properties on N₂O Formation and Reduction during Circulating Fluidized Bed Coal Combustion
Hao Liu, Toshinori Kojima, Bo Feng, Dechang Liu and Jidong Lu
- 357 Investigation and Application of “Bluff-body in Cavity” Burner for Pulverized Coal Combustion
Gang Chen, Ji-Hua Qiu, Ming-Hou Xu, and Chu-Guang Zheng
- 371 Flow Regimes, Holdup and Pressure Loss for Two-Phase Flow Through Vertical and Near Vertical Tubes
P.L. Spedding, G.S. Woods, R.S. Raghunathan and J.K. Watterson
